

MANNKUMAR MUKESHBHAI PRAJAPATI

B.Tech. - Computer Science & Engineering

Ph: +91-8469830384

Email: 23bce262@nirmauni.ac.in

Ahmedabad, Gujarat, India - 382418

LinkedIn: <https://www.linkedin.com/in/mann-prajapati-831a46327/>

PROFESSIONAL SUMMARY

Computer Science undergraduate with a passion for building intelligent, scalable software. Experienced in developing end-to-end applications and leveraging AI to solve real-world engineering challenges.

KEY EXPERTISE

C++ Python HTML5 CSS Javascript React.js Redux Node.js Express.js REST APIs Bootstrap
Tailwind-CSS MySQL MongoDB PostgreSQL Git Linux Docker DSA OOPs DBMS Operating Systems
Computer Networking Artificial Intelligence Machine Learning Cloud Computing AWS

EDUCATION

Institute of technology, Nirma University

2023 - 2027

B.Tech. - Computer Science & Engineering | CGPA: 8.72 / 10

Vivekanand Higher Secondary School, Ahmedabad

2023

12th | GSEB | Percentage: 85.53 / 100

Hiraba Sikshan Sankul, Ahmedabad

2021

10th | GSEB | Percentage: 95.66 / 100

INTERNSHIPS

SrashtaSoft | IT / Computers - Software

04 May, 2026 - 19 Jun, 2026

Software Developer

Key Skills: Express.js Node.js MongoDB Docker Git React.js Redux

Engineered a production-ready Headless CMS platform from scratch, emphasizing scalable backend architecture, database design, and API engineering.

Architected a modular Express.js REST API with authentication, content management, media services, and dynamic routing supporting independent frontend and admin applications.

Designed scalable MongoDB data models using Mongoose with efficient document relationships and schema validation.

Built enterprise-grade security with JWT authentication, bcrypt hashing, role-based authorization, OTP verification, and protected administrative workflows.

Developed a schema-driven page generation engine that dynamically renders complete websites directly from database-managed content.

Integrated Cloudinary-based media infrastructure with optimized upload, storage, and retrieval mechanisms for scalable asset management.

Applied clean architecture principles, reusable middleware, centralized error handling, and activity auditing to deliver a maintainable and extensible production-grade system.

PROJECTS

Talksy.AI – AI Mock Interview Platform with Voice Analytics

Key Skills: Node.js Express.js React.js Redux MongoDB Firebase Razorpay

Project Link: <https://github.com/mann-prajapati05/Talksy-AI>

Built a full-stack AI-powered mock interview platform enabling personalized resume-based interviews, integrating LLM APIs for resume analysis, contextual questioning, and evaluation. Engineered timed interview workflows with speech-to-text input and generated analytics reports with

question-wise evaluations, scoring insights, and PDF exports. Built a credit-based system with Razorpay payment integration and implemented secure authentication using JWT, HTTP-only cookies, and Google OAuth.

SolarGuard – AI-Powered Solar Inverter Predictive Maintenance System

Team Size: 5

Key Skills: Python FastAPI XGBoost Scikit-learn Pandas MERN Stack

Project Link: https://github.com/mann-prajapati05/HackMind_SolarGaurd

Built an AI-driven system to predict solar inverter failures up to 7 days in advance using engineered telemetry KPIs (efficiency, power drop, imbalance).
Developed XGBoost models for risk classification and severity scoring, enabling early detection of degradation and shutdown risks.
Built a full-stack pipeline using FastAPI, Node.js, and MongoDB for real-time prediction and monitoring.

ACHIEVEMENTS

- Hack-NU-thon 6.0: Top 10 in ReveSoils Track

ASSESSMENTS / CERTIFICATIONS

AWS Cloud Foundations course offered by AWS Academy

Provider: Amazon Web Services (AWS)

Key Skills: Cloud Computing AWS

Through this program, I developed a solid understanding of core cloud computing concepts and practical AWS services, including:

- AWS global infrastructure and core services (EC2, S3 and more)
- Networking fundamentals such as VPC, subnets, and security groups
- Identity and access management (IAM) and the shared responsibility model
- Basics of cloud security, pricing, and cost management
- How to design scalable and reliable applications on the cloud

CO-CURRICULAR ACTIVITIES

- Participated in HackaMined Hackathon
- GDG On Campus Solution Challenge
- Hack-NU-thon 6.0
